

# Oregon State University in Congressional District 4

Photo by Steve Terrill

Oregon State University is Oregon’s fastest growing university with nearly 28,000 students. During the last five years, the university has attracted more valedictorians and salutatorians from Oregon high schools than any other university in the state. Last year, OSU faculty earned more than \$263 million in research grants and contracts. OSU is one of only two land, sea, space and sun grant institutions in the United States.

OSU research is primarily conducted on the OSU campus in Corvallis, but it has statewide and global implications. OSU generates more than \$2 billion in annual economic impact through our teaching, research, outreach and engagement. OSU’s main campus is located in Corvallis, and the OSU–Cascades branch campus is located in Bend. OSU operates the Hatfield Marine Science Center in Newport as well as 15 agricultural experiment stations and research centers and six forest research laboratories around the state. OSU Extension has offices and programs in all 36 Oregon counties, and there are seven Extension offices in Oregon’s Fourth Congressional District.

## Academic year 2013-14

Undergraduate students	4,383
Graduate & professional students	658
Undergraduate degrees awarded in 2013	966
Graduate and first professional degrees awarded in 2013	184
OSU alumni	29,044
Full-time employees	10,039.83
Payroll	\$564,634,237

## 2013-14 federal financial aid to CD4

Type of Aid	Students	Value
Pell Grants	2,016	\$8,777,783
Federal Work Study	218	\$448,692
Ford Direct Loans	2,687	\$27,521,824
Perkins Loans	522	\$825,837

## Oregon is our campus

Oregon State University maintains 64 physical locations throughout the state. These locations are supplemented by the virtual presence of OSU Extended Campus and Oregon Open Campus programs, making the university a vital partner in workforce and economic development, locally focused research, public health assistance and other issues.

## OSU Extension Service

OSU Extension Service faculty work with businesses, growers, foresters, youth, community leaders and OSU scientists to solve problems and conduct research relevant to the communities where they live and work. Results from that research circle back to the community through OSU Extension programs like 4-H youth development, family and community health and agriculture and natural resources.
